**3. HAZARDS IDENTIFICATION**

**POTENTIAL ACUTE HEALTH EFFECTS:**

NPK fertilizers may irritate eye and skin upon contact. In keeping with good industrial hygiene practices, exposure to any chemical should be kept to a minimum.

**POTENTIAL CHRONIC HEALTH EFFECTS:**

No information available.

**EMERGENCY OVERVIEW:**

The product presents little or no immediate hazard. The product is not considered flammable, but may burn in liquid form. May generate toxic gases when heated and ammonia when hydrolyzed by heated. When mixed with hypochlorites, when hydrolyzed or heated. When mixed with hypochlorites, nitrogen oxides may form which explodes spontaneously in air (about 100°C).
